## Education

### *The University of North Carolina at Charlotte*

2018 Doctor of Philosophy in Bioinformatics and Computational Biology  
*Advisor: Daniel Janies, Ph.D.*  
*Wayland H. Cato Doctoral Fellow*

2015 Master of Science in Data Science and Business Analytics  
*Advisor: Mirsad Hadžikadić, Ph.D.*

2014 Bachelor of Arts in Applied Mathematics, Concentration in Statistics  
*Advisor: Mary Kim Harris, Ed.D.*  
*Coffey Scholar, C.L. Robbins Scholar*

## Industry Positions

### *Tuple (a Microsoft Partner)*

Founded the only Microsoft and Databricks partner firm specializing in scalable cloud -omics solutions. Tuple provides data architecture and research consulting services in Azure, focusing on cloud AI in the life sciences. Co-wrote the Azure Data Scientist Microsoft Certified Solution Associate exam (DP-100) and the MS Learn Azure Data Scientist exam. Created the azbasespace connector for Illumina BaseSpace to Azure and the ahab system for -omics in Kubernetes. Microsoft Partner-of-the-Year nominee for 2023.

August 2019 - Present Founder & Principal Consultant

### *Amissa*

Co-founded Amissa, a digital health company that's using cloud-based AI and analytics with wearable devices to help in the fight against Alzheimer's disease. Designed and built the Sinuo platform, which applies state-of-the-art artificial intelligence techniques to sensory data, biomarkers, and additional patient metrics. Amissa's work has been funded by the NIH's National Institute for Aging and the NSF's I-Corps program.

March 2020 - Present Co-Founder & VP of Technology

### *Seagen*

Established a scalable cloud computing architecture on Azure to support the Translational Sciences group in the discovery of therapeutic targets for antibody development in oncology. This includes an automated, Kubernetes-based workflow for scalable RNA-seq, WES, protein docking, and pharmacodynamics pipelines along with supporting GxP-qualified data platform, data lake, and machine learning architecture. Collaborated with Research to design scalable, cloud-based protein structural analyses for antibody candidates against tumor targets. Productionalized drug sensitivity ML models using gene expression data. (To be acquired by Pfizer Inc.)

September 2021 - Present Mgr. ML & Cloud Engineering, Bioinformatics  
March 2021 - September 2021 Sr. Scientist, Bioinformatics

*BlueGranite (a Microsoft Partner)*

Developed data platform and AI solutions using the Microsoft Azure cloud with services such as Azure Machine Learning, Cognitive Services, and Databricks (Apache Spark). Hosted many training workshops and gave conference presentations and demonstrations on Microsoft advanced analytics technologies. Started and led the genomics practice, building scalable solutions for bioinformatics analyses in Azure. (Acquired by 3Cloud LLC.)

May 2020 - October 2021	Principal Architect, Life Sciences
December 2020 - May 2020	Genomics Practice Lead
December 2020 - May 2020	AI Practice Lead (Interim)
November 2018 - December 2020	Solution Architect, Artificial Intelligence
January 2017 - November 2018	Senior Data Scientist

*Edge Systems - The HydraFacial Company*

Lead the data science and cloud infrastructure team through research and development initiatives related to IoT medical device informatics. Responsible for innovation with product marketing and engineering to improve and enhance technology products and processes. Implemented computer vision capabilities on the HydraFacial skin analyzer device for detection and classification of dermatologic conditions. (NASDAQ IPO: SKIN, now called Beauty Health Co.)

July 2019 - March 2020    Director of Data Science

*Ember.AI*

Developed a custom artificial intelligence engine for building state-of-the-art natural language processing models for fraud and compliance-related use cases. Built a large-scale, massively parallel processing architecture using Amazon Web Services and Databricks (Apache Spark) for interactive model training. (Acquired by Barrick Gold Corp.)

August 2018 - March 2020    Chief Data Scientist

*AmerisourceBergen*

Developed machine learning experiments and data analysis workflows to aid in pharmaceutical client analytics. Created analysis pipelines for the discovery and understanding into patient drug adherence and rare disease drug access. Consulted in company data architecture including master data management and governance for future business strategy to grow value for client accounts. (Now called Cencora.)

February 2016 - February 2017    Senior Data Science Lead, Lash Group

*Mariner (a Microsoft Partner)*

Consulted in the development of machine learning experiments, including parametric and non-parametric models, statistical predictions, and data mining. Built Azure cloud-based solutions for data collection, processing, and storage using Microsoft Azure Technologies such as Data Science Virtual Machines, Machine Learning Studio, Azure SQL Database, and more. Designed and created interactive visualizations for both dashboarding and reporting using Microsoft Power BI, Tableau Desktop & Tableau Server.

October 2014 - February 2016    Data Scientist

## Academic Positions

### *The University of North Carolina at Charlotte*

Redesigned and taught *Cloud Computing for Data Analysis* (DSBA 6190) for the School of Data Science Master's program. Received a funding grant from Microsoft to modernize and rebuild the course content on the Azure cloud platform. Performing research in a broad range of fields in the bioinformatics and computational biology space including infectious diseases, epistasis, human genomics, and phylogenetics.

September 2023 - Present	Visiting Scholar	CIPHER Research Center
November 2021 - August 2023	Associate Faculty	School of Data Science
July 2021 - Present	University Business Partner	Research and Economic Development
January 2021 - May 2021	Public Health Researcher	Dept. of Public Health
January 2019 - July 2021	Bioinformatics Researcher	Dept. of Bioinformatics and Genomics
January 2019 - May 2021	Associate Faculty	School of Data Science
April 2018 - December 2018	Postdoctoral Researcher	Dept. of Bioinformatics and Genomics
May 2016 - April 2018	Research Assistant	Dept. of Bioinformatics and Genomics

### *Northeastern University*

Taught a summer session of machine learning to graduate students in the LEVEL analytics program.

May 2015 - August 2015	Guest Lecturer	Dept. of Business and Analytics
------------------------	----------------	---------------------------------

### *North Carolina New Schools*

Responsible for entire technology inventory: ordering, maintenance, management, etc. and maintained school website. Liaison between college (CCC&TI) and high school technology departments. Taught NCVPS mathematics courses, held additional teaching sessions in math and science and SAT & ACT preparation.

April 2014 - October 2014	Technology Facilitator	Caldwell Early College
April 2014 - October 2014	Mathematics Instructional Assistant	Caldwell Early College
