Education

The University of North Carolina at Charlotte

2018 Doctor of Philosophy in Bioinformatics and Computational Biology

Advisor: Daniel Janies, Ph.D.

Dissertation: An Integrated Phylogeographic Analysis of the Bantu Migration

Wayland H. Cato Doctoral Fellow

2015 Master of Science in Data Science and Business Analytics

Advisor: Mirsad Hadžikadić, Ph.D.

2014 Bachelor of Arts in Applied Mathematics, Concentration in Statistics

Advisor: Mary Kim Harris, Ed.D. Coffey Scholar, C.L. Robbins Scholar

Industry Positions

BlueGranite

Developed data platform and AI solutions using the Microsoft Azure cloud with services such as Azure Machine Learning Service, Cognitive Services, and Databricks (Apache Spark). Managed client engagements including requirements gathering, project planning, and budgeting. Hosted many training workshops and gave conference presentations and demonstrations on Microsoft advanced analytics technologies. Started and led the genomics practice, building scalable solutions for bioinformatics analyses in Azure. (BlueGranite.com/Genomics)

December 2020 - Present Genomics Practice Lead November 2018 - Present AI Solution Architect January 2017 - November 2018 Senior Data Scientist

Amissa

Amissa is a digital health company that's using cloud-based AI and analytics with wearable devices to help in the fight against Alzheimer's disease. Responsible for the Sinuo platform, which applies state-of-the-art artificial intelligence techniques to sensory data, biomarkers, and additional patient metrics.

March 2020 - Present Co-Founder & VP of Technology

Edge Systems - The HydraFacial Company

Lead data science team through research and development initiatives related to IoT medical device informatics. Responsible for innovation with product marketing and engineering to improve and enhance technology products and processes. Implemented computer vision capabilities on the HydraFacial skin analyzer device for detection and classification of skin conditions.

July 2019 - March 2020 Director of Data Science

Ember.AI

Developed a custom artificial intelligence engine for building state-of-the-art natural language processing models for fraud and compliance-related use cases. Built a large-scale, massively parallel processing architecture using Amazon Web Services and Databricks (Apache Spark) for interactive model training.

August 2018 - March 2020 Chief Data Scientist

AmerisourceBergen - Lash Group

Developed machine learning experiments and data analysis workflows to aid in client analytics. Created analysis pipelines for the discovery and understanding into patient drug adherence and rare disease drug access. Consulted in company data architecture including master data management and governance for future business strategy to grow value for client accounts.

February 2016 - February 2017 Senior Data Science Lead

Mariner

Consulted in the development of machine learning experiments, including parametric and non-parametric models, statistical predictions, and data mining. Built Azure cloud-based solutions for data collection, processing, and storage using Microsoft Azure Technologies such as Data Science Virtual Machines, Machine Learning Studio, Azure SQL Database, and more. Designed and created interactive visualizations for both dashboarding and reporting using Microsoft Power BI, Tableau Desktop & Tableau Server.

October 2014 - February 2016 Data Scientist

Staples

Managed store operations from labor planning, planograms, and inventory. Supervised store P&L of EasyTech department for technology, warranty, & repair service sales.

April 2011 - June 2014 Operations Supervisor & Tech Sales Supervisor

Caldwell Hospice and Palliative Care

Pioneered the transition from hand-written, paper medical forms to electronic data input and served as a database administrator. Worked closely with HIPAA and Medicare/Medicaid guidelines for data compliance.

August 2008 - December 2011 Medical Records Database Administrator

Academic Positions

The University of North Carolina at Charlotte

Teaching *Cloud Computing for Data Analysis* (DSBA 6190) for the Data Science Initiative Master's program. Received a funding grant from Microsoft to modernize and rebuild the course content on the Azure cloud platform. Performing research in a broad range of fields in the bioinformatics and computational biology space including infectious diseases, epistasis, and human phylogenetics.

January 2019 - Present
January 2019 - Present
April 2018 - December 2018
May 2016 - April 2018

Associate Faculty
Bioinformatics Researcher
Postdoctoral Researcher
Graduate Assistant

Associate Faculty
Bioinformatics and Genomics
Dept. of Bioinformatics and Genomics
Dept. of Bioinformatics and Genomics

Northeastern University

Taught a summer session of machine learning to graduate students in the LEVEL analytics program.

May 2015 - August 2015 Guest Lecturer LEVEL

North Carolina New Schools

Responsible for entire technology inventory: ordering, maintenance, management, etc. and maintained school website. Liaison between college & high school technology departments. Taught NCVPS mathematics courses, held additional teaching sessions in math and science and SAT & ACT preparation.

April 2014 - October 2014 Technology Facilitator Caldwell Early College
April 2014 - October 2014 Mathematics Instructional Assistant Caldwell Early College
